OUR VALUES

- Integrity
- Honesty
- Quality

OUR MISSION

To deliver the best training and customer service possible by building partnerships, not just relationships!

- ✓ OSHA 1910.179 requires that only Designated and Qualified people may operate overhead cranes.
- ✓ OSHA 1926.1427 requires the employer to ensure that each operator is trained, certified, licensed, and evaluated.
- ✓ OSHA referenced industry standard ASME B30.2 requires owners to provide both classroom and hands on training to all operators. Including both a written and practical examination.
- ✓ CMAA says that it is the responsibility of the crane owner to establish programs to train and designate qualified crane operators.
- ✓ ASME B30.9 says sling users SHALL be trained
- ✓ OSHA 1926 Requires employers to use only qualified riggers
- ✓ OSHA 1910.184 says only designated and competent people can perform sling pre shift inspections. Designated is defined as qualified. How can someone be qualified without training?

WE HELP YOU INVEST IN YOUR MOST IMPORTANT ASSEST - YOUR PEOPLE!
